

IUEA PROSPECTUS 2020-2021

INTERNATIONAL
UNIVERSITY
OF EAST AFRICA

'Learning to Succeed'

Innovation
in
Education

Welcome to **INTERNATIONAL UNIVERSITY OF EAST AFRICA**

I am delighted that you are considering International University of East Africa as an option for your studies.

We are a university that believes in offering a transformational experience for its students, ensuring that you grow and develop in ways that you might not even yet have dreamed of.

We are one of the strongest universities in East Africa; that means we don't just rely on a heritage stretching back over many years but focus on making history every day. Our growing numbers and high graduate employability demonstrate that we are a real force in the higher education sector.

International University of East Africa welcomes students from all around the globe to study in our fantastic location along Ggaba Road, Kansanga, Kampala, Uganda, the Pearl of Africa. Our campus is stylish and modern, set in a thriving location where you will soon feel at home.

The low cost of living and affordable accommodation is attractive; and our excellent transport links to Kampala town and Entebbe Airport makes us accessible for all.

Our emphasis is on treating every student as an individual and, alongside small teaching classes and personal support, this means that you will soon feel part of our community. We put significant importance on developing courses where employers are actively involved in course design and delivery. As a result of our emphasis on employability and transferable skills, our graduates gain good jobs quickly after graduating. Joining forces with employers, businesses, and research organisations, we give them access to the kind of people they are looking for: you.

So come and join us for a transformational experience, one which you will never forget and will stand you in good stead for the rest of your life.

Professor Emeka Akaezuwa
Vice-Chancellor
IUEA

LEARNING TO SUCCEED

We're not just another university. We're a type of university, proud to be different; proud to not follow the crowd. While many institutions are becoming increasingly large and impersonal, we're committed to being more supportive and distinctly more personal. Our University was founded on a bold vision of technology – a type of university that combines the best traditions with all the opportunities and advances of the modern world. We love education, and we believe in its power to transform lives. Above all, we believe that this experience should be both exciting and entirely unique to the individual. Our role is to support you to the best of our abilities, to provide you with the opportunities you deserve, and to treat you as much more than just a 'student'.

Technology is at the heart of our philosophy. The twenty-first century is characterised by change. We believe that this is something to be inspired by rather than resisted. The world is constantly evolving, and so are we. We will help you to develop the skills and insights that will always be relevant, no matter how things change further down the road. In a world where nothing ever stays the same, we all need to Learn to Succeed.

That's what we do. Be bold and join us.

ABOUT US

As one of the strongest universities in the Uganda, we have absorbed the best university traditions and aligned them with a twenty-first century audience and the modern world of employment and entrepreneurship.

Studying with us is a different experience to elsewhere. Our University is like no other.

- We are a university for a changing world
- Our teaching is based on relationships as well as research
- Our campus is beautifully situated and perfectly compact
- Enjoy low living costs with every amenity within walking distance
- Our courses are focused on the world of employment

“ My choice of International University of East Africa was based on the fact that it has so much to offer to its students. IUEA can be defined as a student-shaped university. I am feeling really supported and motivated to achieve my results in the best way possible. ”

Joel Mugisho
Bachelor of Information Technology
Democratic Republic of Congo

WHY CHOOSE US?

- Scholarships & Free Transfers
- Excellent University education at affordable fees
- Interactive teaching techniques
- Emphasis on practical experience, research, innovation, modern skills and humane values
- Small class sizes / Low Student to Lecturer ratio
- Lecture notes & slides available on elearning platform
- Superb library of books & electronic resources
- Free laptops for students*
- Free WiFi on campus for all
- Modern lecture rooms equipped with projectors
- Top Professors & Lecturers from around the world
- On-campus medical facilities with standby ambulance
- Sports facilities for everyone
- The largest auditorium in Uganda
- Respect for all religious & cultural backgrounds

A thriving community of scholars & students engaged in the pursuit of advanced knowledge, Practical skills, & humane values

Globally recognized quality, practical & transferable nature of education embracing the latest technology

Dedicated to producing World Class Graduates who are masters of their Craft. IUEA has a High Employment Rate Locally & Internationally 83%

Engineering Labs & Courses to make a world of difference ensuring High Innovation

Hands-on Learning Experiences & Experiments to complement Theoretical Knowledge

Scholarship Beneficiaries: Mosques, Churches, Communities, Sports, Academics, People with Disabilities

Welcome

It is both an honor and privilege to welcome you, our dear Students to this amazing IUEA Community. I encourage you to be open to new experiences, ideas and directions. You are here because you want to be the movers and shakers of the future.

The Office of the Dean of Students urges you to meet new people, tap into new resources and join the IUEA Community. A Community that fosters personal growth, values and celebrates diversity, above all, prioritizes the well-being of all its members.

We coordinate and oversee Student health and Safety, Student Pass(International Students),Sports and recreation, Student Leadership, alumni affairs, community engagement, accommodation, other areas of student life that support growth and development. Enjoy the Student experience during our stay with us and beyond.

We encourage you to embrace this journey of self-discovery. Our job is to help you get there.

Best of luck to each and every one of you.

Jane Sekitoleko

DESTINATION UGANDA

Uganda offers a rich and diverse cultural life, thriving sites, malls, restaurants and cafés, and an extensive arts scene. Uganda has been described as the most hospitable and friendliest country globally following a survey conducted among expatriates globally, according to the BBC. Uganda is steeped in history, with beautiful scenery, the source of the Nile and a variety of national parks, foods, all within easy reach from Kampala city.

Students who come to study in IUEA will find an exciting campus that sees things a little differently. Proud of its heritage, IUEA is embracing its strategic central location and burgeoning technology connections in Kampala, evolving into one of the most desirable places to study and live in Uganda.

Visit [iuea.ac.ug](https://www.iuea.ac.ug)

International University of East Africa

We are proud that 83% of our graduates were in work or further study six months after graduating, according to surveys. This high percentage confirms the strong emphasis on employability and enterprise across all our degrees.

EMPLOYABILITY

A degree equips you with many of the skills you need to prepare for your future career. Whether you choose a qualification with a clear career path, or a degree with many transferable skills, you can be confident that you will gain the knowledge you need with us.

Employability is not just about developing relevant skills, or getting a job; it is about your whole personal, academic and professional development. Whilst studying at International University of East Africa, you will have the opportunity to hone your personal strengths and identify and work on your areas of development.

All of our degrees enable you to get involved in problem solving, creative thinking, team working, delivering presentations and using digital technologies; all of which are essential skills needed in the world of employment. Many of our degree courses incorporate modules in professional practice, or graduate development programmes to enable you to put into practice your learning, engage with employers and outside organisations, and discover where your studies could take you in life.

Don't leave thinking about your career and employability until the end of your study. There are opportunities to get involved from the moment you start here; you could take an active part in a Students' Union club or society, be a course representative, or volunteer. All of these activities enable you to develop your employability.

A number of these activities are accredited and will appear when you graduate, enabling you to present a range of achievements to potential employers.

Our graduates have gone on to a wide range of career paths in fields as diverse as corporate and technological companies world wide.

Career fairs on campus provide you with an opportunity to network with local, national and international organisations. You may have a clear career path in mind, or have no idea what you want to do after you graduate. Whatever your situation, the IUEA can support you with one-to-one careers advice and guidance on next steps after your course.

IUEA offers workshops on:

- How to develop your employability
- Making effective career decisions
- Writing effective CVs and applications
- Successful interview technique
- Using social media to find opportunities
- Networking and effective communication

STUDENT LIFE

Being an IUEA student is a journey of self-discovery. You can expect to develop and flourish, establishing a sound foundation for your future and providing a gateway to exciting possibilities and ambitions.

Through your studies you will be able to explore a subject for which you have a passion, developing an in-depth understanding of the subject area and carving out your own specialities and interests. You will learn and practice new skills, considering how they can be employed in practical situations, and you will develop the ability to select and tailor these skills in complex and demanding situations.

Working with your tutors and fellow students, you will expand your abilities to communicate and work within teams, gaining deeper insight into how you can contribute effectively. Throughout your studies, you will be able to discover your own strengths and preferences, equipping you to make long-term career and personal choices and help you to realise your goals and ambitions.

On your course you will work and study alongside your fellow students, forming friendships and relationships that will not only help you in your studies but may also continue well beyond your time here.

Socially, you will have the chance to get to know other students from a wide range of cultures and nationalities and be exposed to many different personal beliefs and philosophies.

By becoming involved in clubs and societies you will find others who share your passions, be they of a sporting, educational or social nature.

Enrolling on a university course often marks a new start in a student's life, incorporating challenges of personal independence and responsibility. You will need to make choices about how to meet the demands of your course and your desires to socialise and expand your horizons, as well as considering whether to take on part-time work to support your studies. We hope that by exploring these factors in the university environment, you will be confident to stretch and test yourself knowing that there is a supportive structure behind you.

Students of IUEA are not only encouraged to concentrate on academics, but to also take part in other co-curricular activities.

The campus has first class facilities that range from an electronic library, computer labs, engineering labs, to classrooms equipped with modern facilities for top standard education. It also has wireless internet. The university also has a large super cozy auditorium that sits 1500 people. The university also has modern accommodation that will make you feel at home, plus a cafeteria for resident students. IUEA has a wide centre for games and sports with a health/first aid centre and a stand by ambulance for emergencies.

Students are generally expected to demonstrate high standards of moral conduct and to refrain from immoral and degrading practices like using alcohol, smoking, taking addictive drugs, reading pernicious literature, gambling and other immoral activities.

Your days as a student are likely to be some of the most exciting, transforming and fulfilling of your life. As an IUEA student you will be presented with many different opportunities enabling you to take charge of your own personal and professional development.

The University Campus

IUEA main campus is located in Kansanga Kampala Uganda and draws students from East Africa and from the rest of the world. The International University of East Africa celebrates an multi-cultural atmosphere. For example, it is not unusual at IUEA to have a student project group made up of students from Uganda, Egypt, DRC, Eritrea, and Nigeria working on a problem assigned by a lecturer from New Zealand.

IUEA is a thriving international community of Scholars and students engaged in the pursuit of advanced knowledge, practical skills and human values. At IUEA, we are dedicated to producing excellent graduates who are masters of their chosen fields of study, highly employable, and capable of producing new products.

Accommodation

The University has five hostels of residence. Three are for male students, one is for female students and one for both male and female students. In total the hostels host a population of about 395 resident undergraduates (students registered to the University). The rest of the students reside outside of campus in private hostels or commute from homes. Falcon Estates Department & the Dean of Student Department, with the assistance from wardens are responsible for maintaining the university hostels. The Dean of Students Department with assistance of the wardens ensure that appropriate accommodation and other services are provided to students in accordance with their prevailing budgets. Both Private and Government students are accommodated through this department and allocation of rooms is done by respective hostel committees chaired by the wardens. Security on campus is the responsibility of the university security department and the Uganda police force. Private hostels provide their own security arrangements for the students they accommodate. The Uganda police force patrol also provides extra security both within and outside the campus.

Student Health Services

The University has a premier health service that provides medical facilities to students throughout their studies maintained by a team of doctors and a number of nursing assistants on a full-time basis. The University clinic also provides health insurance to students.

Religious Life

The University is non-denominational so students have freedom of worship, however, all days of the week are considered working days for purposes of lectures and examinations.

Food Court

The University café and canteen offers meals and drinks served at modest charges. In addition, there are other eating and recreational places within the vicinity of the university campus.

Postal, Telephone & Internet Services

There are postal, telephone, email and fax facilities within the university and its neighborhood. Students are also free to use their own mobile telephones and connect to the campus wireless internet service.

Student Organisations, Societies & Clubs

Students are encouraged to form clubs at the university and these are integral to a student's extra-curricular experience. These clubs are meant to encourage them in social and academic interactions.

General Provisions of Admission

- **Direct entry into a Bachelor programme**

- a) At least five (5) passes at the Ugandan Certificate of Education (UCE) level obtained at the same sitting or its equivalent.
 - b) At least two (2) principal passes at the Ugandan Advanced Certificate of Education (UACE) level obtained at the same sitting or its equivalent.
- Admission will be conditional on verification upon receiving the official Ugandan National Examinations Board (UNEB) Results slips.

- **Direct entry into a Diploma programme**

- a) At least five (5) passes at the Ugandan Certificate of Education (UCE) level obtained at the same sitting or its equivalent.
 - b) At least one (1) principal passes and two (2) subsidiary passes at the Ugandan Advanced Certificate of Education (UACE) level obtained at the same sitting or its equivalent.
 - c) A Higher Education Certificate with a 'pass' classification.
- Admission will be conditional on verification upon receiving the official Ugandan National Examinations Board (UNEB) Results slips.

- **Diploma holder's entry into a Bachelor's degree**

Applicants with evidence of having completed an accredited Diploma or its equivalent from a recognized institution may be eligible for direct entry into the second year of a Bachelor's programme with a credit classification or the first year of a Bachelor's programme with a 'pass' classification.

- **Direct entry into a Higher Education Certificate**

- a) Uganda Advanced Certificate of Education with at least two subsidiary passes or its equivalent.
- b) Vocational Qualifications at level 2 or level 3 of the Uganda Vocational Qualifications Framework.
- c) Qualifications equivalent to Uganda Advanced Certificate of Education (UACE) as shall be determined by the National Council in consultation with the Uganda National Examinations Board.
- d) Foreign students without UACE or its equivalent qualifications; who have successfully completed secondary school education and are admissible to university degree or diploma programmes in their respective home countries. Such students shall have passed at least five subjects with a minimum overall grade of C (Plain). In addition, foreign students whose studies were not conducted in English shall show proof of proficiency in the English Language.

Admission will be conditional on verification upon receiving the official Ugandan National Examinations Board (UNEB) Results slips.

- **Foundation of Higher Education Certificate holder's entry into a Diploma or Bachelor's degree**

Applicants with evidence of having completed an accredited Foundation or Higher Education Certificate or its equivalent from a recognized institution may be eligible for direct entry into a Diploma with a 'pass' mark or Bachelor Programme with a 'credit' or higher classification.

• International applicants

- a) International Applicants should provide evidence of qualifications from recognized institutions from their home country or the country where they studied.
- b) Applicants who successfully completed a 13 year education system in their home country or the country where they studied may be considered for direct entry into a Diploma or Bachelor programme pending equating of their results from the UNEB.
- c) Applicants who successfully completed a 12 year education system in their home country or country where they studied may be considered for direct entry into a Degree programme provided that they were admitted onto and studied one year in a tertiary qualification in that country pending equating of their results from the NCHE.
- d) Applicants without with a or b are required to complete a Foundation or Higher Education Certificate.

Applicants shall be granted conditional admission for one semester pending the completion of equating of their qualifications through the required authority (UNEB or NCHE).

• Mature age entry

IUEA is an inclusive institution and applicants over the age of 25 years without the required entrance requirements are encouraged to apply for our programmes and take advantage of a quality education. To apply, applicants must have passed an accredited Mature Age Entrance Examination with a pass mark of 50% through an approved Centre by the NCHE.

• Exemptions or special entry considerations

Exemptions require special consideration and permission from the relevant Faculty Admissions Boards and the Senate in accordance with the University's policies on Exemption and Credit and Accumulation and Transfer.

Graduate Studies Admissions Guidelines

• Master of Business Administration

- a) A minimum of a Second Class (Lower division) undergraduate degree from Business, Public Administration or any related fields from a recognized University/institution.
- b) A Postgraduate Diploma in Business or Management, Public Administration or any closely related field from a recognized university/institution.
- c) Any professional business qualifications such as ACCA, CPA (U).
- d) Both local and foreign applicants with work experience of two years and above.
- e) Applicants who have not met the minimum requirements may be offered conditional admission and will be required to pass an IUEA Graduate Admission Test depending on their educational background.
- f) Applicants must also submit their pre-tertiary qualifications (UCE and UACE).

• Master of information Technology

- a) A minimum of a Second Class (Lower division) undergraduate degree in Computer Science or Information Technology or any related fields from a recognized University/institution.
- b) A Postgraduate Diploma in Computer Science or Information Technology or any closely related field from a recognized university/institution.
- c) Both local and foreign applicants with work experience of two years and above.
- d) Applicants who have not met the minimum requirements may be offered conditional admission and will be required to pass an IUEA Graduate Admission Test depending on their educational background.
- e) Applicants must also submit their pre-tertiary qualifications (UCE and UACE).

All applicants are required to have standard of English proficiency equivalent to at least IELTS 6.5 in Academic English or above. Applicants may be recommended to study IUEA's remedial English Language courses. IUEA-CLAPS offers testing for students to determine their level of English Proficiency.

COURSES

Teaching at the University is spread across four academic schools each with their own personality and ethos which is reflected in the portfolio of courses.

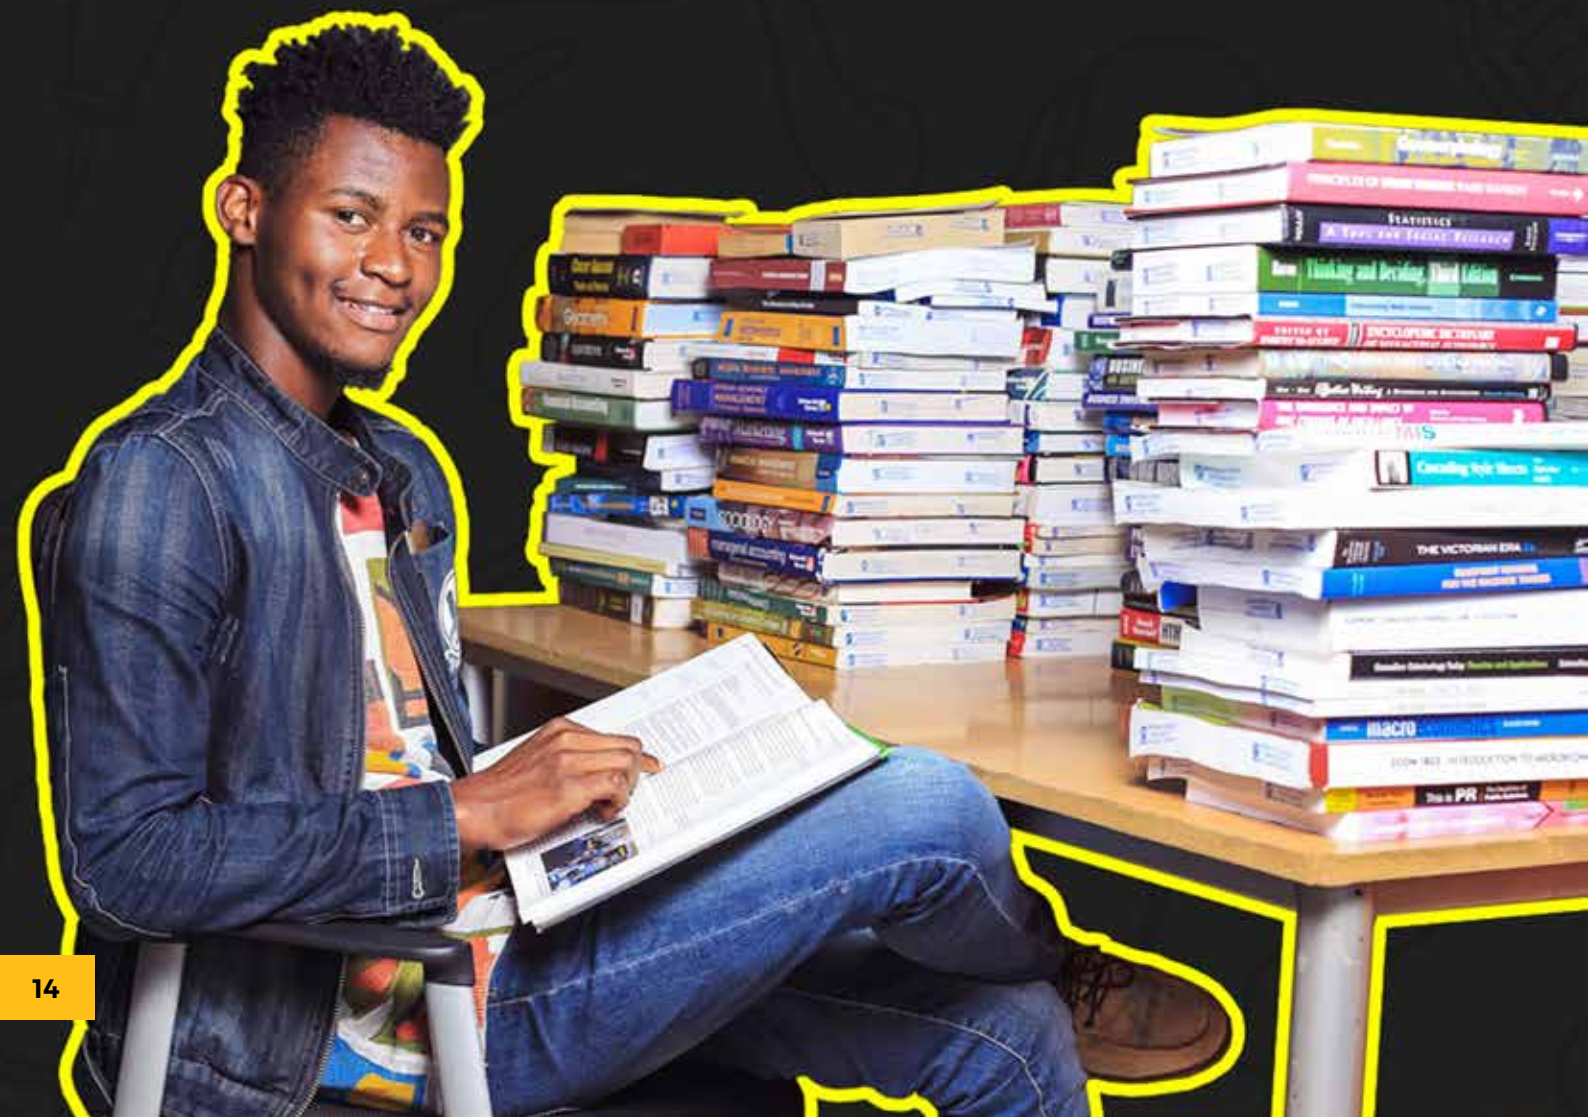

Whichever course you choose, you will experience study that is characterised by innovative and leading-edge approaches to learning and teaching, informed by the research and scholarly activity of our academic staff.

“ The admissions process and student - staff ratio was on top of my priority list when choosing IUEA. It has been easy to get help from the lecturers and the website has been able to pretty much give me all the information I need about my uni life, from my course to daily necessities. ”

Michelle Wandia

The following pages list the courses available at International University of East Africa. Please note that applicants will need to fulfil the specific entry requirements detailed fully on the Admissions pages of our prospectus and website.

- **Faculty of Business & Management**

Diploma in Public Administration
Diploma in Business Administration
Bachelor of Business Administration (Accounting, Finance, Marketing)
Bachelor of Public Administration
Bachelor of Human Resource Management
Bachelor of Economics
Bachelor of Procurement & Logistics Management
Bachelor of Tourism Operations & Management
Master of Business Administration (MBA)

- **Faculty of Science & Technology**

CISCO
Diploma in Computer Science
Bachelor of Information Technology
Bachelor of Science in Computer Science
Bachelor of Science in Environmental Science & Management
Bachelor of Science in Software Engineering
Master of Information Technology

- **Faculty of Engineering**

Diploma in Architecture
Diploma in Civil Engineering
Diploma in Electrical Engineering
Bachelor of Science in Petroleum Engineering
Bachelor of Science in Civil Engineering
Bachelor of Science in Electrical Engineering
Bachelor of Science in Mobile & Satellite Communication
Bachelor of Science in Mining Engineering
Bachelor of Architecture

- **Faculty of Law**

Bachelor of Law

- **Centre for Languages & Professional Skills**

Certificate in English (Beginner)
Certificate in English (Elementary)
Certificate in English (Pre-Intermediate)
Certificate in English (Intermediate)

- **Foundation Programme**

Higher Education Certificate in Business
Higher Education Certificate in Information Technology
Higher Education Certificate in Engineering
Higher Education Certificate in Law

FACULTY OF BUSINESS & MANAGEMENT

Introduction

The Faculty of Business and Management of IUEA is a hub of excellent business education where students acquire knowledge and also practical skills.

The global economy is becoming more competitive due to advancements in technology and market forces at play. As such, business and technology have become inseparable. Efficiency in all spheres of business is being enabled by the incorporation of technology in most business processes. For instance, many businesses are using online strategies for purchase, sales, advertising, marketing, etc.

Vision

Our vision and mission are consistent with the aspirations of the university as a whole that is; To be the number one choice for Business and Management in East and Central Africa.

Mission

- To produce world class, creative and socially responsible graduates who are global thinking.
- To provide and disseminate world class education to our students that shape organizations and businesses.
- To integrate business and technology.
- To engage meaningfully with society and develop practical solutions to common problems.
- To encourage entrepreneurship and creativity
- To provide an education that includes practical skills.

Internship Programme

All our students in the Faculty of Business and Management are required to seek work placements so that they can apply what they have learnt at university and also receive work place exposure. The main objectives of the internship are;

- To ensure that their education includes practical skills.
- To prepare to them for employment.
- To enable them to develop interpersonal skills.
- To provide a platform where they can relate theory and practice.

This exercise is instrumental in exposing students to the real world. Many are retained upon successful completion of their courses. This shows that an education in our Faculty increases your employability.

Courses Offered

- Diploma in Public Administration
 - Diploma in Business Administration
-

FACULTY OF ENGINEERING

Introduction

The Faculty of Engineering at IUEA is one of the fastest faculties of engineering in Uganda and East Africa. It is gaining popularity among faculty leavers, parents, schools students, and industries. This is because all the engineering programmes offered by IUEA are currently supported by international level syllabi and top quality laboratories. Our students, accordingly, will have great employment opportunities.

Vision

The vision of the Faculty is to be a leading provider of Engineering and Technology based education with innovative approaches to enhancing lifelong career opportunities. This is emphasized by our mission to provide engineering education based on a theoretical, experimental, and ethical foundation and enhanced by opportunities for participation in research, internships and interdisciplinary study.

Mission

- To provide high quality and innovative teaching and learning that maintains professional accreditation for all its programmes.
- To provide an education based on a theoretical, experimental and ethical foundation enhanced by opportunities for participation in research, internships and interdisciplinary programmes.
- To educate graduates for professional leadership, civic influence and lifelong learning.

For all degrees within the Faculty, IUEA links with industry help to provide internship training placements for students. Internships are compulsory for all students as per the requirement of the NCHE of Uganda.

Internship (Industrial Training)

To meet the requirements of accreditation by the Engineering Accreditation Council of NCHE of Uganda and also compliment the theory and practical study at IUEA, a well-structured internship (industrial training) programme in collaboration with industry has been incorporated into the curriculum. The structures of all the programmes offered by the Faculty of Engineering include three periods of training each of 10-15 weeks.

The main aims and objectives of the internship programme are to provide:

- Enhanced Employability
- Interpersonal and Social Skills
- Interrelationships of Theory and Practice
- Career Preparation
- Insight into the World of Work
- Personal Development
- Technical Development

This Internship programme will further enhance student's employability. In many cases the same company at which you had internship training will offer you employment as soon as you graduate. In all cases, you will gain an invaluable insight into the world of work as an Engineer and be better equipped to position yourself for the carrier you seek.

Whether you join IUEA immediately after your secondary education or transfer to us from another institution of higher learning, we offer programmes depending on your prior qualifications and experience. There will be a clear progression of your learning to ensure that you will be empowered with the necessary skills and knowledge to enter the corporate world. If you enter our foundation course first, you will take a range of modules that will assist in developing your basic engineering knowledge prior to entering the degree programme and this allows time for decision on which of our degrees you want to pursue. At all times, our staff will be able to advise you on the choices available at each stage of your studies.

Learning Outcomes

The following programme outcomes shall be attained in your completion of the degree programme.

- Ability to gain and apply basic principles of Mathematics, Science and Engineering.
- Ability to identify engineering problems and apply basic engineering principles to solve them.
- Ability to recognize and apply suitable tools and techniques for engineering practical applications.
- Ability to investigate complex engineering problems using research techniques.
- Ability to design innovative solutions for complex engineering problems.
- Ability to communicate effectively and professionally.
- Ability to comprehend and demonstrate current good practices of engineering for sustainable development and environmental considerations.
- Ability to practice safety, health, social, cultural, legal and environmental responsibilities as an engineer.
- Ability to execute the responsibilities of an Engineer professionally and ethically.
- Ability to function effectively as a team leader or a member in a team.
- Ability to recognize the need for, and be able to engage in independent and life-long learning towards continuous professional development.
- Ability to demonstrate and apply the knowledge and understanding of engineering management and finance.
- Ability to solve tasks in an international context.

Courses Offered

- Diploma in Architecture
 - Diploma in Civil Engineering
 - Diploma in Electrical Engineering
-
- Bachelor of Science in Petroleum Engineering
 - Bachelor of Science in Civil Engineering
 - Bachelor of Science in Electrical Engineering
 - Bachelor of Science in Mobile & Satellite Communication
 - Bachelor of Science in Mining Engineering
 - Bachelor of Architecture

Careers

- Civil Engineers
- Electrical Engineers
- Mechanical Engineers
- Petroleum Engineers
- Software Engineers
- Architects
- Surveyors

Introduction

The Bachelor of Law Programme (LL.B) is unique in placing a strong emphasis on communication skills and practical experience of the legal field of work throughout a student's four years of study. Law firms and governments want law graduates who possess excellent writing skills and outstanding oral expertise. This programme is designed to produce law graduates who write very well, speak properly and confidently, and think critically.

Further, the LL.B Programme consists of courses designed to equip law graduates with a firm foundation to address contemporary issues on the local and international scenes in these fields: petroleum industry, mining industry, alternative dispute resolution, transitional justice, and clinical legal aid. There is also offered a course to instil professionalism and legal ethics: Lawyers, Practice and Ethics.

Vision

To be a fountain of excellent legal knowledge and skills and the edifice of legal education in Africa.

Mission

To provide an excellent legal education that includes practical legal and leadership skills.

Objectives

To train and nurture lawyers who:

- Have a sound understanding of law and legal institutions, so as to enable them to serve the needs of Uganda, East Africa and the international community;
- Have high intellectual skills, particularly the ability to think analytically and critically, to solve legal and related problems, and to communicate effectively, both orally and in writing;
- Understand the social, political and economic foundations and perspectives of law.
- Appreciate the role of law in social development.
- Have a firm foundation for a variety of careers in public institutions, industry, commerce and the legal profession.
- Have a firm foundation for further education, to extend their qualification to post graduate status.

- Have the requisite qualification to pursue professional qualifications in law, particularly necessary for legal practice, as required by the Uganda Law Development Centre or other such professional institutions of law.

Learning Outcomes

Learners who are awarded the Bachelor of Law (LL.B) of the International University of East Africa will have demonstrated their competence in each of the following areas:

- In-depth knowledge of a substantial range of the concepts, values, rules and principles of the foundational subjects of law, and of the legal system of Uganda as well as other legal systems.
- Have cognitive skills, enabling a student to identify the relative merits and demerits of different legal and policy arguments as articulated in case law and legal scholarship.
- Have practical and professional skills enabling a student to provide an informed and reasoned opinion based on case law and statute of the possible legal solutions.
- Demonstrate appropriate communication skills and the ability to express complex principles of law in clear written and spoken English.
- Have an informed understanding of their discipline or professional practice, and the ability to question its principles, practices and boundaries.

Courses Offered

- Bachelor of Law

Careers

- Lawyers
- Paralegals
- Judges
- Consultants

FACULTY OF SCIENCE & TECHNOLOGY

Introduction

Our faculty programme is accredited by National Council for Higher Education (NCHE). Faculty of Science aims to be a forerunner in using ICT to support educational programmes and enhance the delivery of its specialized curriculum. The faculty provides outstanding teaching facilities, well-equipped laboratories and qualified academic staff. The Faculty continuously makes efforts to collaborate with industry leaders, as well as, leading researchers and academics in universities worldwide.

The Faculty of Science and Technology at IUEA offers an undergraduate program; Post graduates program, as well as short certified certificate courses in the core areas of information technology and in an array of application and interdisciplinary areas. Because computational thinking is so important, and there are broad range of topics within Science and Technology with diverse interests, students are guided into different specializations during their second year of study, where they pick a practical subject of interest on the list of provided specializations to fit their future ambitions and goals.

Vision

We envision to be the most trusted technological university to harness the potential of ICT as a key contributor in the development of society.

Mission

Our Faculty Motto is "Knowledge", "Skills" and "Innovation". Our mission is to prepare students with the "Knowledge", "Skills" and "Innovation" to contribute a better society.

Objectives

- Produce our students for logical and innovative thinking, confident presentation skills and innovative problem-solving. techniques is part and package of essentials within the curriculum to ensure FST graduates remain applicable and always hunted after by employers.
- Graduate innovative thinkers and implementers of information technology solutions.
- Produce leading scientists and practitioners in the area of information technology who are capable of meeting the technical skills requirement needed by industry.
- Graduate students who are able to compete in a global economy.
- Enable those interested in research in Information technology to obtain additional qualifications.
- Empower graduates to become job creators and produce innovative ICT solutions.
- Give an opportunity to those non-graduates already working in ICT to obtain a formal qualification in ICT through self-study.
- Graduates will learn to communicate effectively in career and educational environments.
- Graduates will have a strong foundation in computing and mathematical theoretical concepts and can apply these concepts to problems requiring computer solutions.
- Graduates understand, and are proficient in the use of, system design notations and system design engineering process to develop software systems and solve problems in computer science.

- Graduates will apply their computer science knowledge and skills to develop a career in an information technology oriented business or industry, or for graduate study in computer science or other scientific or technical fields.
- Produce graduates who are well educated in the fundamental concepts of software engineering and able to continue their professional development throughout their careers.
- Produce graduates with good communication skills capable of functioning responsibly in diverse environments and able to work in teams.
- Overall produce graduates from our faculty who are innovative and are capable of creating jobs that is "JOB CREATORS" NOT JOB SEEKERS.

Objectives

- To build human resource capacity in the Software engineering discipline in both the public and private sectors to students who wish to become proficient in developing software in a variety of languages, platforms and applications using a methodical approach.
- The course combines theory with consideration of its application in software engineering practice.
- Have a deep understanding of the theoretical foundations of information technology.
- Be practically competent in the analysis, design, development, testing and deployment of information technology systems.
- Have the skills to ably manage computer networks, be a skilled systems or database administrator and be able to maintain organizational IT infrastructure.
- Be able to gather, analyse and interpret data in an organization to enable improvement of the information resource.
- Gain the knowledge needed to advise organizations on the trends of information technologies.
- Capably manage employees in the information technology section of an organization.
- Have the ability to apply mathematical foundations, arithmetical principles, and computer science theory in the modelling and design of computer-based systems that demonstrates trade-offs involved in design choices.

Courses Offered

- CISCO
- Diploma in Computer Science

- Bachelor of Information Technology
- Bachelor of Science in Computer Science
- Bachelor of Science in Environmental Science & Management
- Bachelor of Science in Software Engineering

- Master of Information Technology

Careers

- Cybersecurity Engineers
- IT Consultants
- Cloud Architects
- Mobile Application Developers
- Web Developers
- Software Engineers
- Hardware Engineers
- Network Administrators
- Data Architects
- Database Administrators

SHORT COURSES

- Advanced Certificate in Humanitarian Logistics
- Advanced Certificate in Project Planning and Management
- Advanced Certificate in Monitoring and Evaluation
- Certificate in Cash Transfer Programming
- Certificate in Transport and Fleet Management
- Certificate in Supply Chain Management
- Certificate in Public Private Partnership
- Certificate in Procurement and Contract Management
- Certificate in Quantitative Data Analysis
- Certificate in Cyber Security
- Certificate in Health and Safety

CENTRE OF LANGUAGES & PROFESSIONAL SKILLS

Introduction

We are the Centre of Languages and Professional Skills. Our aim is to offer world class language and professions courses for our students and the wider market.

Vision

To be a leading Centre of Languages and Professional Development for the higher education market in East Africa.

Mission

To provide IUEA stakeholders with relevant, modern and comprehensive programmes of study, and provide access facilities to meet the language and professional needs of a globalizing market.

Objectives

- Create relevant, in demand programmes appropriate for the local and regional market.
- Provide academic and professional support for IUEA students and staff.
- Use dynamic technological learning strategies to facilitate student learning.
- Meet international standards and expectations of language learning.
- Enhance the University's reputation by offering a diversity of programmes that improve competencies in languages and professional; skills for IUEA students and the local market.
- Assist the University's administration and different faculty needs through testing and facilitation of academic and professional skills training.

Course Offered

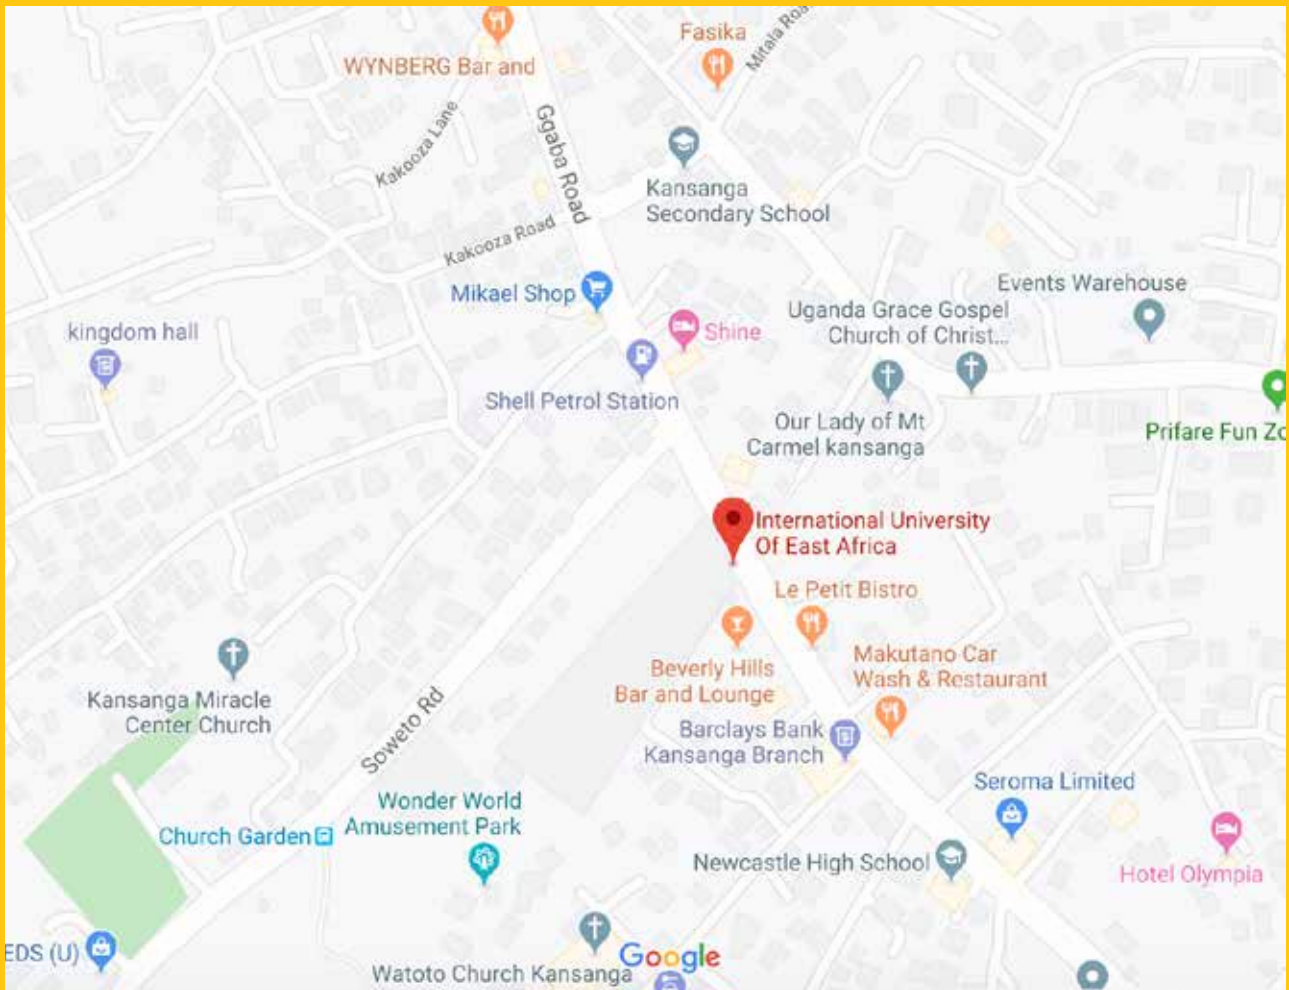

• English

English is the most widely spoken global language and very important for students pursuing higher education. CLAPS at IUEA aims to support students entering their higher education by offering world class and context appropriate English language instruction to prepare them for live long learning.

Our English programme uses both linguistic as well as communicative approaches to language learning so that students can take advantage of learning English and then using it in an English-speaking country.

English courses include **Beginner, Elementary, Pre-Intermediate & Intermediate** and are based on the Common European Framework Reference of Languages. Student class sizes are small to improve the learning experience.
